

PROMOTING CREATIVE THINKING AND SELF-EXPRESSION THROUGH MUSIC AND MOVEMENT FOR CLIL **20 HOURS**

- Do you or do you know someone that plays and instrument, sings, or dances?
- What are some of the positive aspects that you admire in that person?
- Does that person possess skills that show up in other areas of life?

You do not have to be a musician or dancer to use it as a teaching tool. If you like music and dance, that is good enough.

If music and dance help people to cultivate skills, why not include more of it in our schools.

There are many ways teachers can use these to promote creative thinking and self-expression in the classroom
